Sanyukt Bhatt

Game Developer — Unreal Engine 5 — C++

Gurugram, Haryana, India

+91 9899779158 sanyuktbhatt.doon@gmail.com sanyukt-bhatt-533467323 Sanyukt-0

SUMMARY

Motivated and detail-oriented student passionate about game development and programming. Skilled in C++, Java, and Unreal Engine 5. Experienced in building interactive systems and immersive environments. A quick learner with a collaborative mindset, driven to craft impactful gaming experiences and grow in the industry.

TECHNICAL SKILLS

Languages: C++, Java

Game Development: Unreal Engine 5, Blueprints, Gameplay Programming, AI, Level Design

Tools: Visual Studio 2022, Git, GitHub

INTERNSHIP

K.R. Mangalam University – Department of Computer Science **6 Weeks**

Machine Learning Intern *Gurugram, India*

- Built a Heart Disease Prediction model using Logistic Regression, Random Forest, and KNN.
- Preprocessed and cleaned medical datasets using Pandas and NumPy.
- Implemented evaluation metrics like accuracy score and cross-validation to assess model performance.
- Strengthened hands-on skills in Python, ML model building and data preprocessing.

PROJECTS

Bad Bot Game — Unreal Engine 5 (Blueprints)

- Developed a drone-based action game entirely using Unreal Engine Blueprints.
- Implemented player-controlled drone movement, laser shooting mechanics, and projectile collision.
- Designed enemy drone AI with health, hit detection, and combat interactions.

Troll Platformer Game — Unreal Engine 5, C++ ***(Published)***

- Developed and published a troll-style platformer featuring precision movement, deceptive traps, puzzle-based progression, and challenging level design.
- Implemented reusable gameplay systems in C++ and Blueprints, including pressure plates, sliding doors, laser traps, ceiling spikes, falling platforms, checkpoints, and player respawn mechanics.
- Designed progressively challenging levels that encourage experimentation, timing, and learning through failure while incorporating environmental hints to improve player guidance.
- Integrated gameplay audio, background music, sound effects, and interactive feedback to enhance player immersion and communicate gameplay events.

Slash RPG Game — Unreal Engine 5, C++ ***(In Progress)***

- Developing a third-person action RPG featuring melee combat, enemy AI, character progression, and immersive exploration.
- Implemented sword-based combat, enemy behavior, health systems, player statistics, and damage mechanics using C++.
- Utilized Unreal Engine 5 features including Motion Warping, Open World tools, MetaSounds, particle effects, and Quixel Megascans.
- Applied object-oriented programming, gameplay architecture, and Unreal Engine best practices to build scalable gameplay systems.

EDUCATION

K.R. Mangalam University **Expected Graduation: 2027**
B.Tech in Computer Science and Engineering — CGPA: 7.68 *Gurugram, Haryana*

Class 12th **2023**
Percentage: 75.2%

Class 10th **2021**
Percentage: 84.1%

CERTIFICATIONS

Mastering in Machine Learning – Internship
